Total Useful Operating Hours is defined by LM79 standard of 70% degradation (30% loss of light output).

- Every Relume Light Engine Panel, Luminaire and Fixture is specifically engineered for specific performance criteria of a particular industry. This includes, but is not limited to, proper thermal management of the system and LEDs.

*This Data Sheet was designed to illustrate the practical use of Media products at 12hrs per 24hour period or less. In extreme locales when the product may be used on a 24/7 basis, Relume will engineer and develop a thermally managed solution to perform in the specific location's ambient temperature.
