- E. Thread the Relume-supplied SJOOW cord through the rigid EMT and hub assembly and thread the EMT into the threaded portion of the new hub attached to the back plate.
- F. Trim wires to the desired length passing through the pendant EMT and hub assembly. Attach the wires to the already installed electrical system. Make sure the green wire is ground and not attached to a line connection.
- G. Install the hub and pendant to the existing electrical system with the fasteners previously removed in Step D.
- H. Hang the light fixture from the back plate by hooking the light over the hooks on the back plate. Attach the security tether from the light to the back plate and install and tighten the wing nut onto the stud.
- I. Attach the power supply and ground wiring by attaching the Neutral (white) to the white; Line (black) to black; and Ground (green) to green using wire nuts (not furnished).
- J. Pivot the light fixture into final mounting position and push the light fixture tightly against back plate to line up fastener holes. Attach the light fixture to the mounted back plate by installing the supplied mounting screws through the attachment holes located on three (3) sides of the light fixture. Torque machine screws to 23 in./lbs.
- K. Once installation is complete, align the light to proper orientation on the rigid EMT and tighten the anti-rotation set screw in the hub.
- L. Once installation is completed, remove plastic protective sheet from the outer lens.
